## CONDITIONS OF SALE.

---

1. The Cattle will be exposed separately according to the numbers in the following Catalogue. The Auctioneers reserve right to refuse any bid without assigning any reason. The highest offerer on each lot will be preferred to the purchase (subject to Article 3)—each offer exceeding the former by at least one guinea.

2. The pedigree of each animal is guaranteed to be correct and eligible for entry in Coates's Herd Book by the person whose name appears as the exposor, but every animal is sold subject to all faults otherwise, with the exception that if a bull has only one Testicle down, the owner must make intimation to this effect in the Catalogue. No liability whatever is undertaken by the Auctioneers for the statements appearing in the Catalogue or made at the Sale. The Exposor who supplies such statements is alone responsible for any error or mis-statement. Animals affected with any disease of an infectious nature or animals out of an infected Herd are strictly prohibited from being brought to the premises occupied or used by the Company at the time, and should any such be brought, the Owner or Consigner will be held responsible for all damage or loss occasioned thereby

3. The Exposers reserve the right to fix a reserve price, and to announce same before the bidding begins or during the time of the bidding or at the conclusion hereof. The right to bid by or on behalf of the Seller in terms of the Sale of Goods Act, 1893, is expressly reserved.

4. Immediately after each purchase is declared, the risk of the animal shall be exclusively with the Buyer, and it is declared that until a settlement shall be made in terms of these Conditions the delivery of the Animal shall be suspended. The right of property shall not pass until the price is paid.

5. Immediately after the Sale all lots must be paid for in cash to the Auctioneers. The price being paid, each lot shall be taken away at the Buyer's expense within one day after the sale thereof. Lots shall only be removeable from the Auctioneers' possession on a written order from their clerk, and any lot removed in contravention of this condition may be recovered *brevi manu* by the Auctioneers.

6. If any Buyer fail to pay for and remove his purchase in compliance with the above Conditions, the Auctioneers in their option may either (a) sue the Buyer for the price and interest thereon at the rate of *Six per Centum per Annum* and for the keep of, and any other expense incurred by them in connection with such purchase, or (b) re-sell the Lot either publicly or privately and recover from the defaulting buyer the deficiency (if any) attending such re-sale and interest thereon as aforesaid together with the keep and all other expenses. In either case, the Auctioneers shall have the right to sue at their own instance without the consent of the Owner or Consigner, and no defence whatever in such action shall be competent to the Buyer who shall have recourse against the Owner or Consigner alone.

7. If any animal be sold with option to "Test," such condition shall not operate to suspend the sale or the passing of the risk but shall have effect only as follows:—

- (a) The condition shall be provable only by entry in the Auctioneers' Sale Roll.
- (b) The option to test shall only operate in the case of animals making 40 guineas or over.
- (c) The test shall be made at the Buyer's expense.
- (d) The test shall be made by a Veterinary Surgeon to be mutually chosen between Buyer and Seller or, failing their agreement, to be chosen by the Auctioneers.
- (e) The test shall only be made when the animal is (in the opinion of the chosen Veterinary Surgeon) in a fit state for testing. The time for testing shall be limited to three weeks after Sale, with power, however, to the Auctioneers to extend the period of testing from time to time if they, after hearing the chosen V.S., deem such extension reasonable.
- (f) The declaration of the chosen Veterinary Surgeon that the animal has been duly tested and as to the result of his test shall be final and binding.
- (g) If the animal be so declared not to have passed the test, the Buyer shall have the right to require the Seller to re-purchase the animal at the price of the original sale. Such requisition shall be notified in writing to the original Seller, and from the date of receipt of such notice the risk and expense of the animal shall be transferred to him.
- (h) In any case where the option to test is exercised, the Auctioneers shall be entitled to retain the price until the result of the test is declared.

8. No undertaking of the Auctioneers or their servants to take charge of any animal after the Sale or to forward it to its destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of the foregoing conditions.

9. If any dispute shall arise regarding any Shorthorn Animal registered in Coates's Herd Book and sold at this sale (apart from any question relating to the conduct of the sale), such dispute shall be referred to the Council of the Shorthorn Society of Great Britain and Ireland, as sole Arbiters for settlement, and the decision of the Council shall be final and binding on all parties to the dispute.

10. The Auctioneer is appointed Judge of the Sale, to whom are hereby submitted all disputes and differences of any kind which may arise at and in relation to the Auction, either between Exposers and Offerers or among Offerers themselves. And his decision shall be final and binding on all parties, and all actions at law in relation thereto are excluded.
